

WHO's New 5-Year Strategy

World Health
Organization

The Thirteenth General Programme of Work – GPW13

...and the impact framework

21st ANNUAL REVIEW MEETING OF THE HEALTH SECTOR - SKY LIGHT HOTEL, ADDIS ABABA

Dr Boureima Hama Sambo, WHO COUNTRY REPRESENTATIVE - ETHIOPIA

Objectives of the Presentation

- Provide an overview of the GPW13 and its Results Framework
- Highlight how Ethiopia would contribute to the goals and targets in GPW 13 and relevance to HSTP II
- Highlight the need to strengthen the health information system in developing the M&E framework
- Increased focus on information revolution in HSTPII

WHO GPW 13 and the results framework are based on SDGs

WHO's Vision

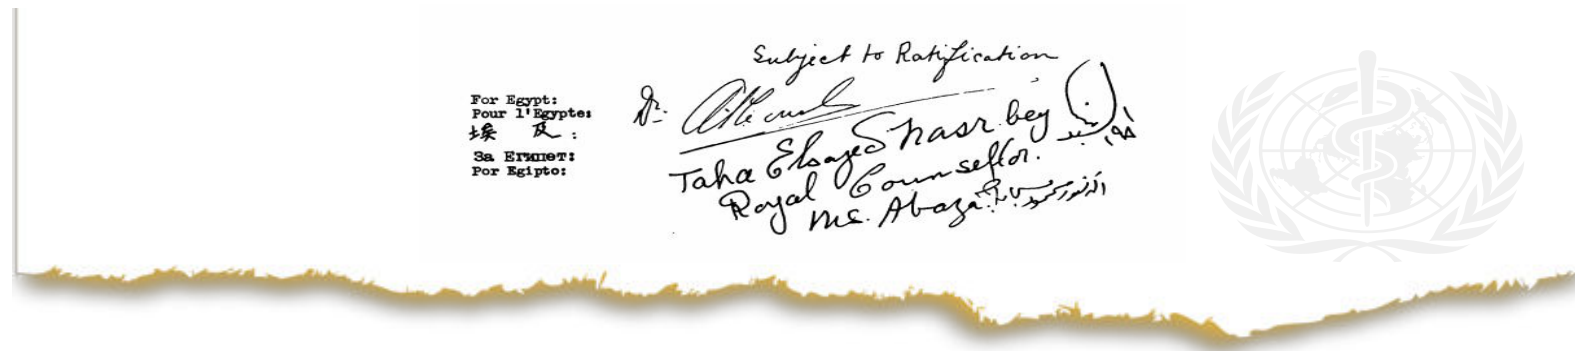

A world in which all people attain the highest possible standard of health and well-being.

Is rooted in the 1948 constitution

CHAPTER I – OBJECTIVE

Article 1

The objective of the World Health Organization (hereinafter called the Organization) shall be the attainment by all peoples of the highest possible level of health.

Programme Budget Appropriation

Resolution 72.1

In resolution WHA72.1, the 72nd World Health Assembly in May 2019;

- Approved the Programme budget for 2020-21
- Requested the Director-General, inter alia, to continue developing the results framework of the Thirteenth General Programme of Work, 2019–2023 (GPW13) in consultation with Member States, including through the regional committees.
- To present it to the Executive Board at its 146th session in January 2020.

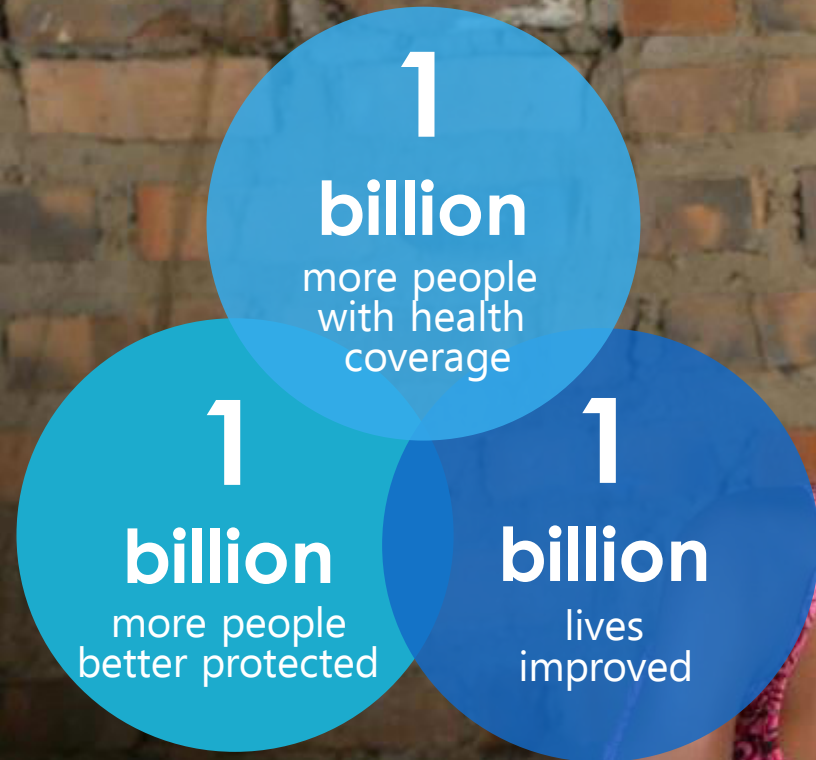

GPW 13 is WHO's new 5-year strategy

- ✓ Aligns all work with the Sustainable Development Goals (SDGs)
- ✓ Establishes a clear mission
- ✓ Sets 3 strategic priorities attached to ambitious goals

.....to focus our work on impact at country level

The 'Triple Billion' Goal

We must reach the "triple billion" in the next 5 years to be on track for delivery of the SDG targets by 2030.

3 Strategic Priorities

- Advancing Universal Health Coverage

- Delivery of essential health services
- Financial protection
- Access to essential health products

- Addressing Health Emergencies

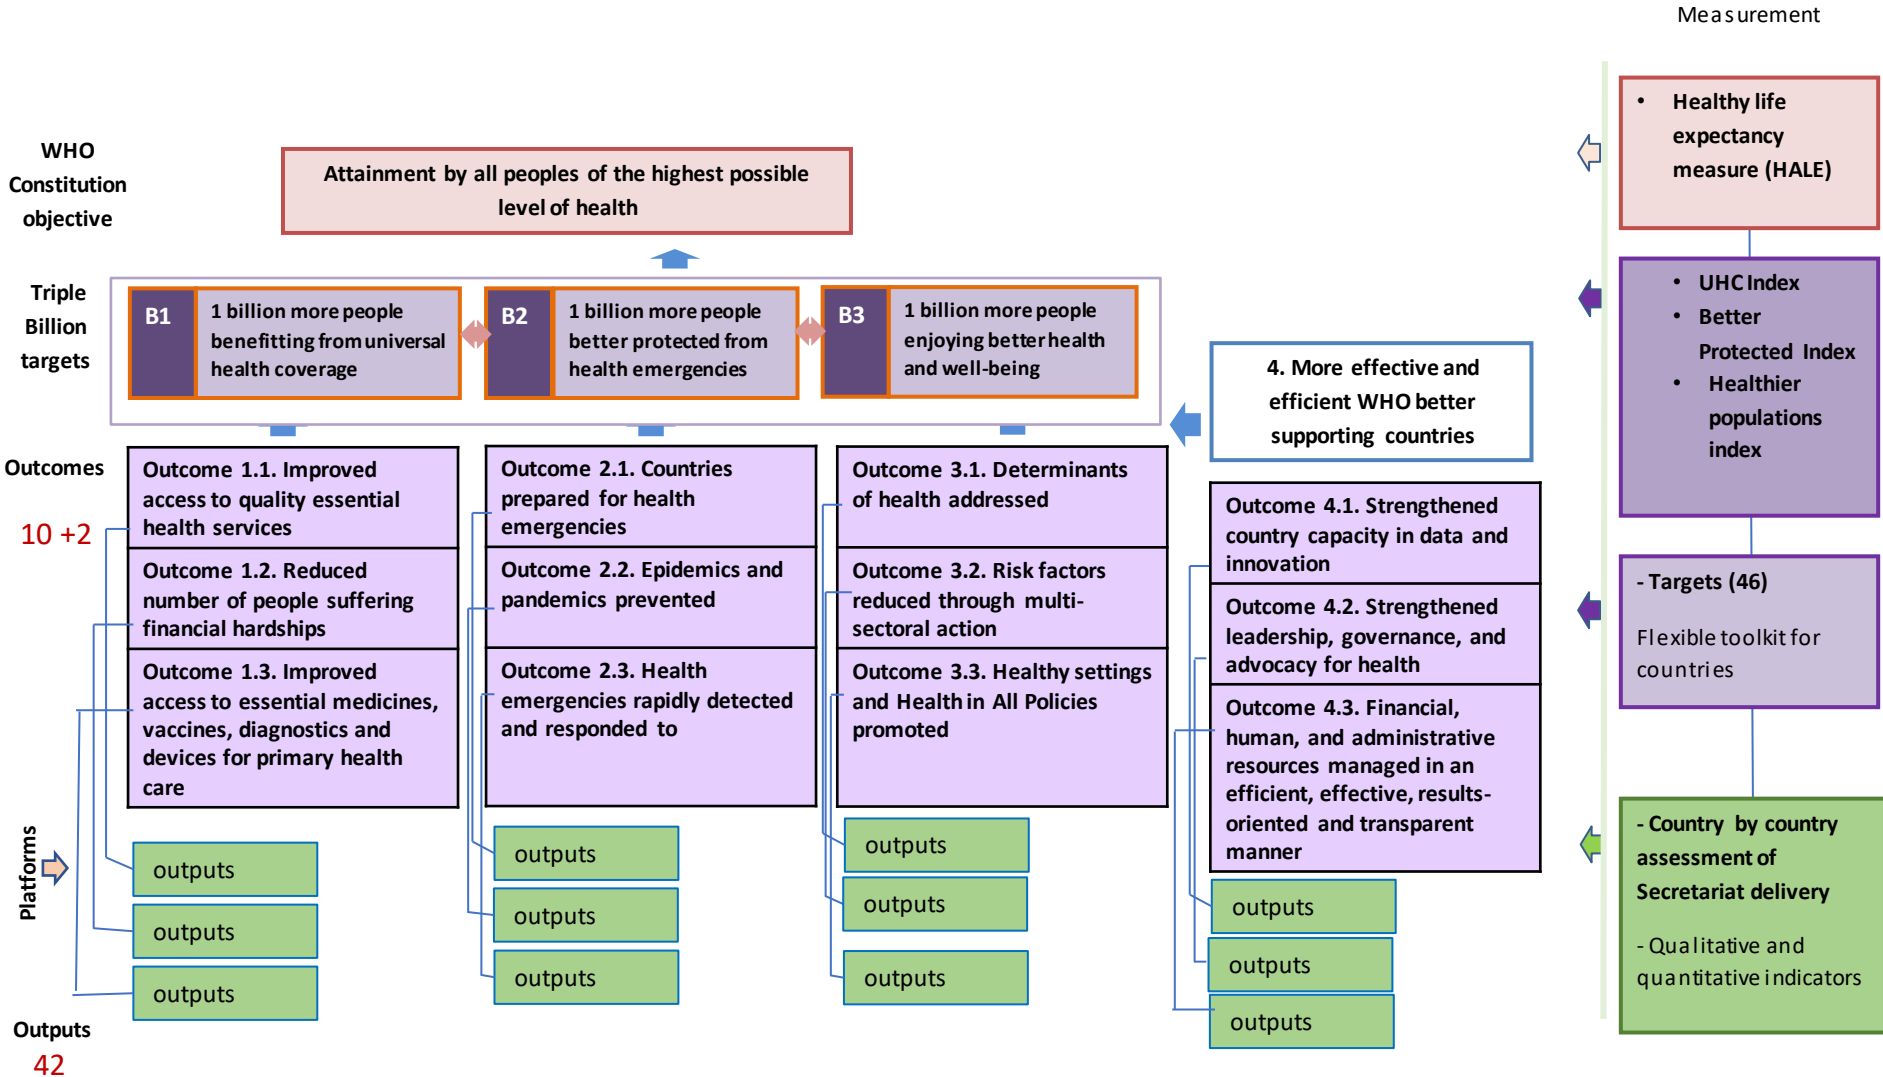

- Prepare for emergencies
- Prevent epidemics and pandemics
- Detect and respond to health emergencies

- Promoting Healthier Populations

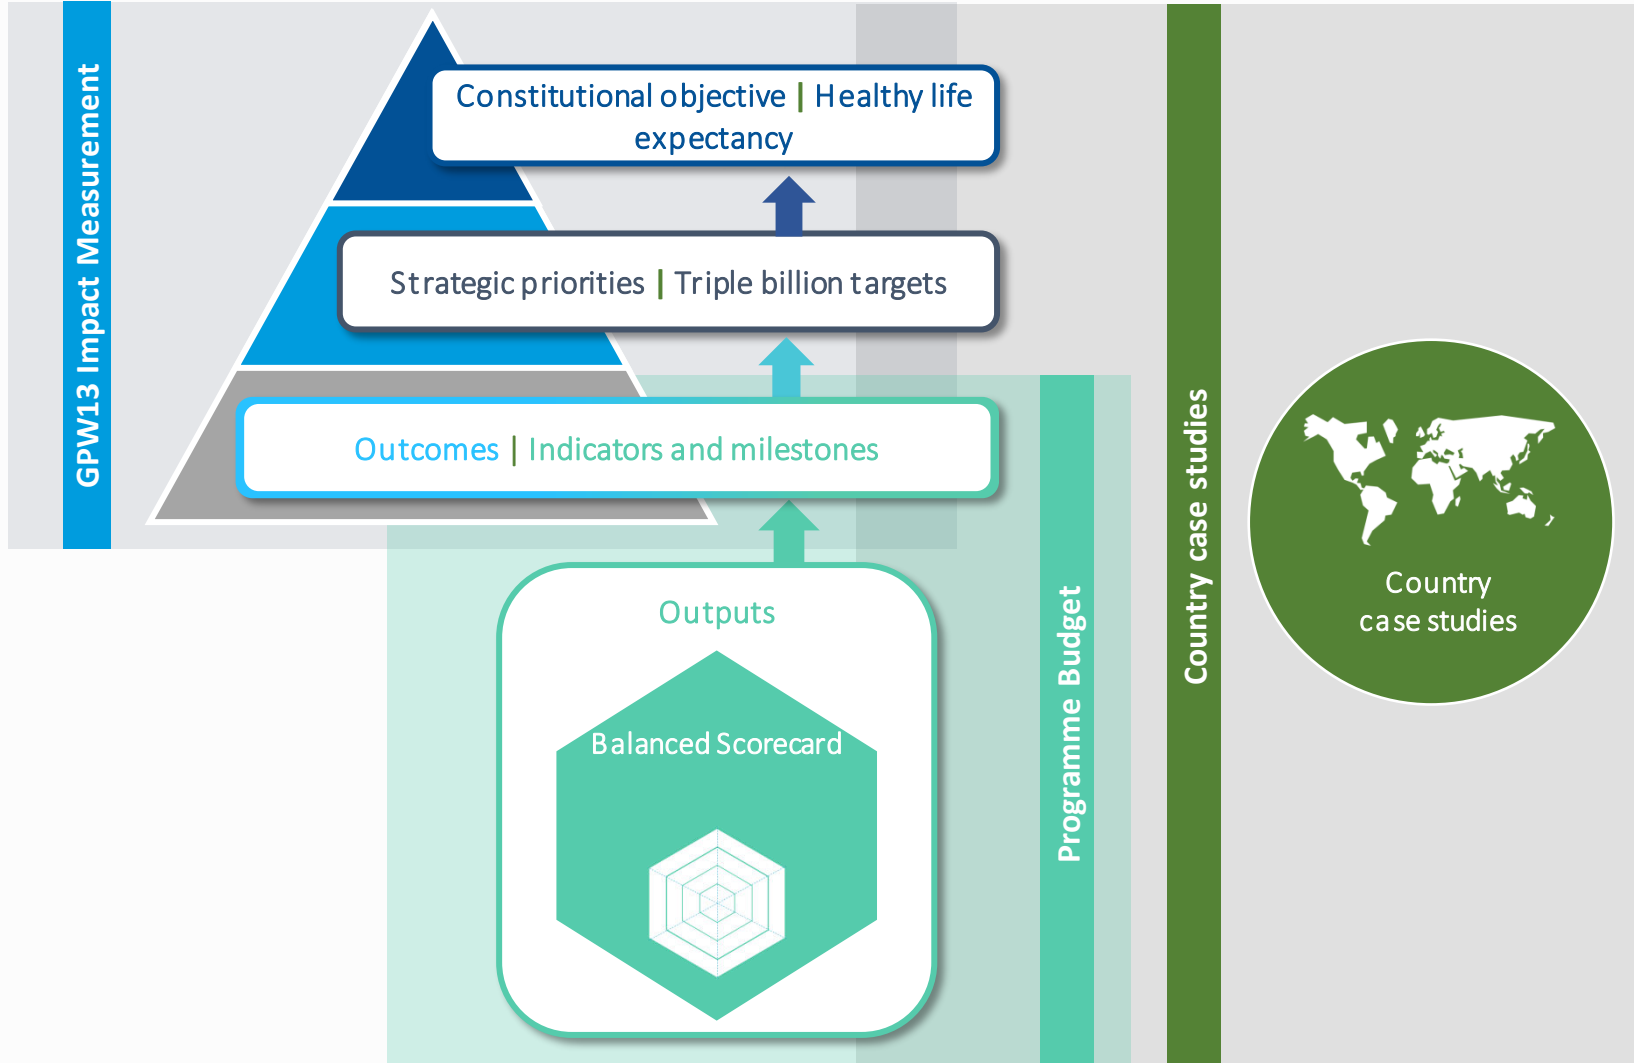

- Determinants of health
- Risk factors to health
- Channels to address health determinants & risks

Aligning for Impact at Country Level

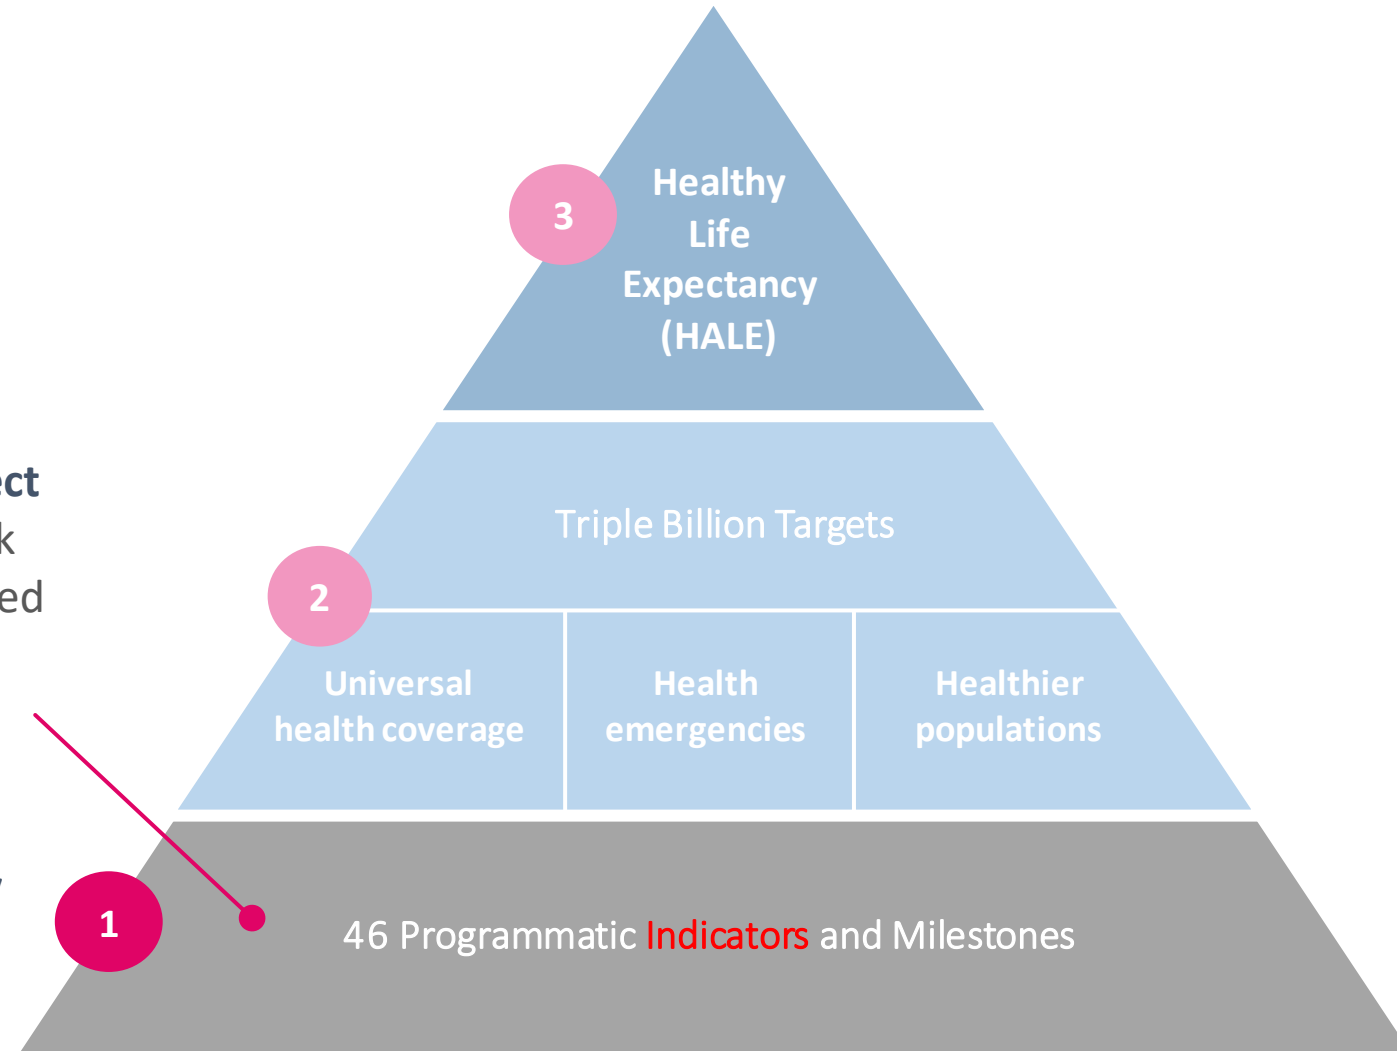

GPW13 Results Framework

WHO Impact Framework

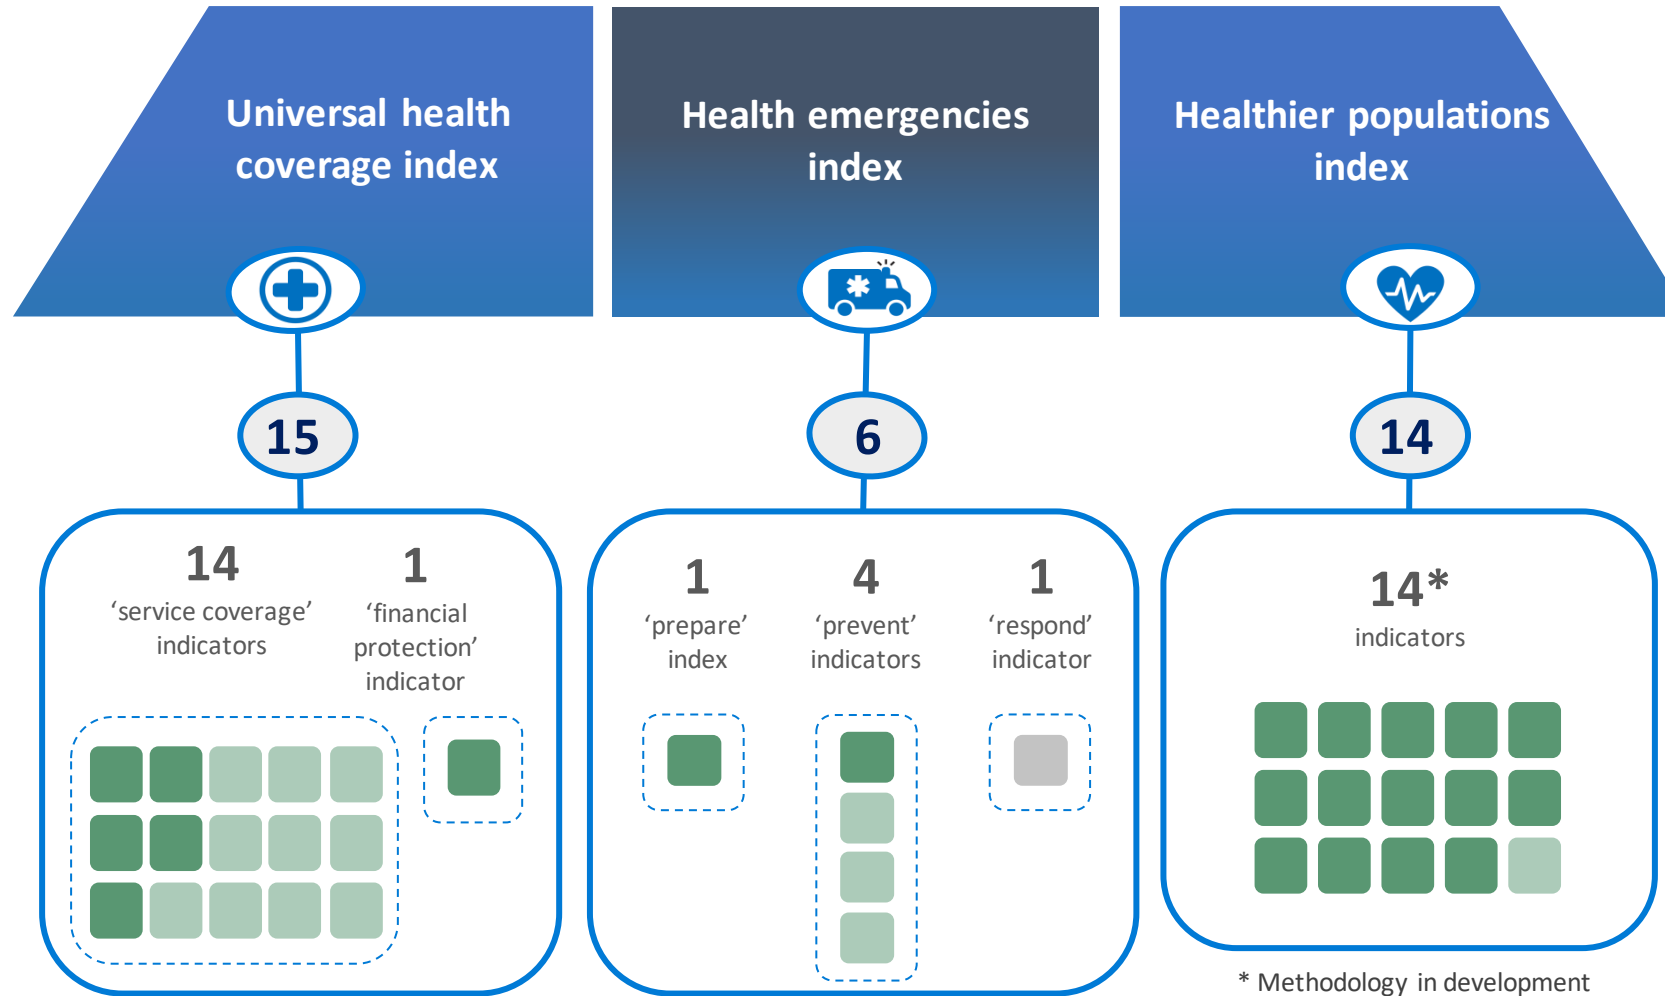

- **Countries will select priorities** and track progress on selected targets using associated indicators.
- **Not every country will track every indicator**

Summary of Target Alignment

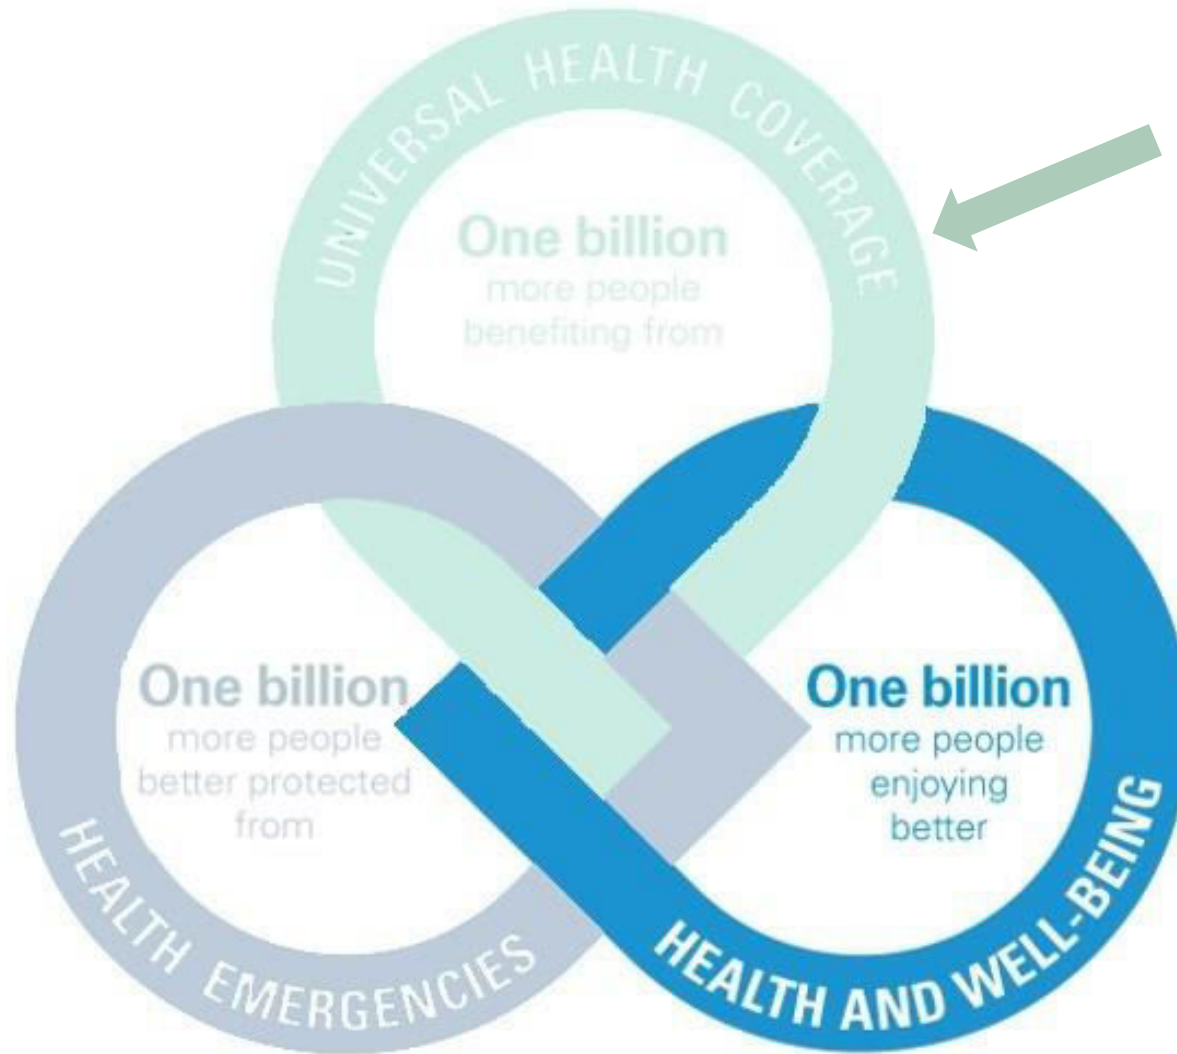

Target Alignment	Number of Targets
Sustainable Development Goals	29
Health assembly resolutions/action plans/frameworks	10
Sustainable development goals and health assembly resolutions/action plans/frameworks	5
New targets (in respect of antimicrobial resistance and mortality from climate sensitive diseases)	2
Total	46

Triple Billion **Targets**

	SDG indicators		Not SDG indicators but involve SDG inputs and are within the 46 programmatic indicators		Other indicators, currently being collected/monitored
---	----------------	--	---	---	---

UHC Billion

1 billion more people benefitting from UHC

Universal Health Coverage Index

**Service coverage
(SDG 3.8.1)**

**Financial protection
(SDG 3.8.2)**

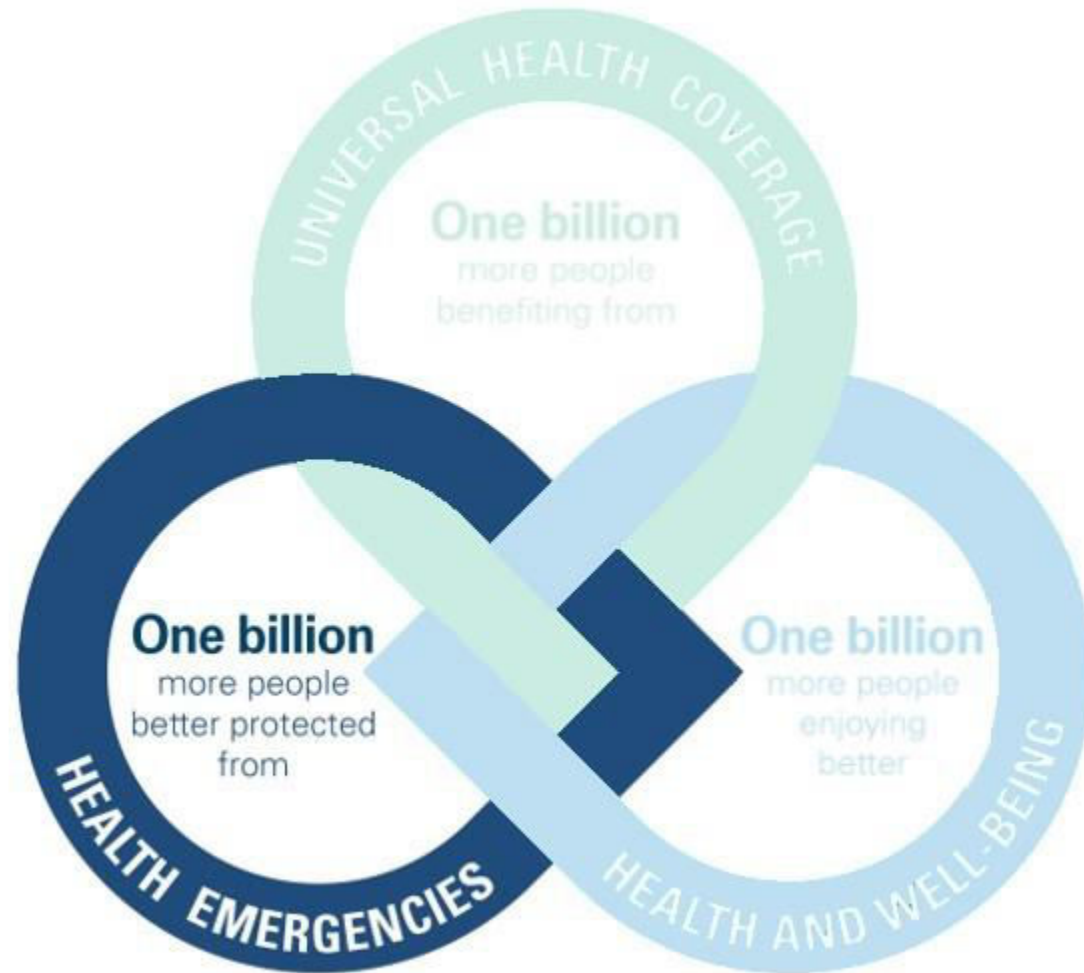

**Universal health
coverage**

Health Emergencies Billion

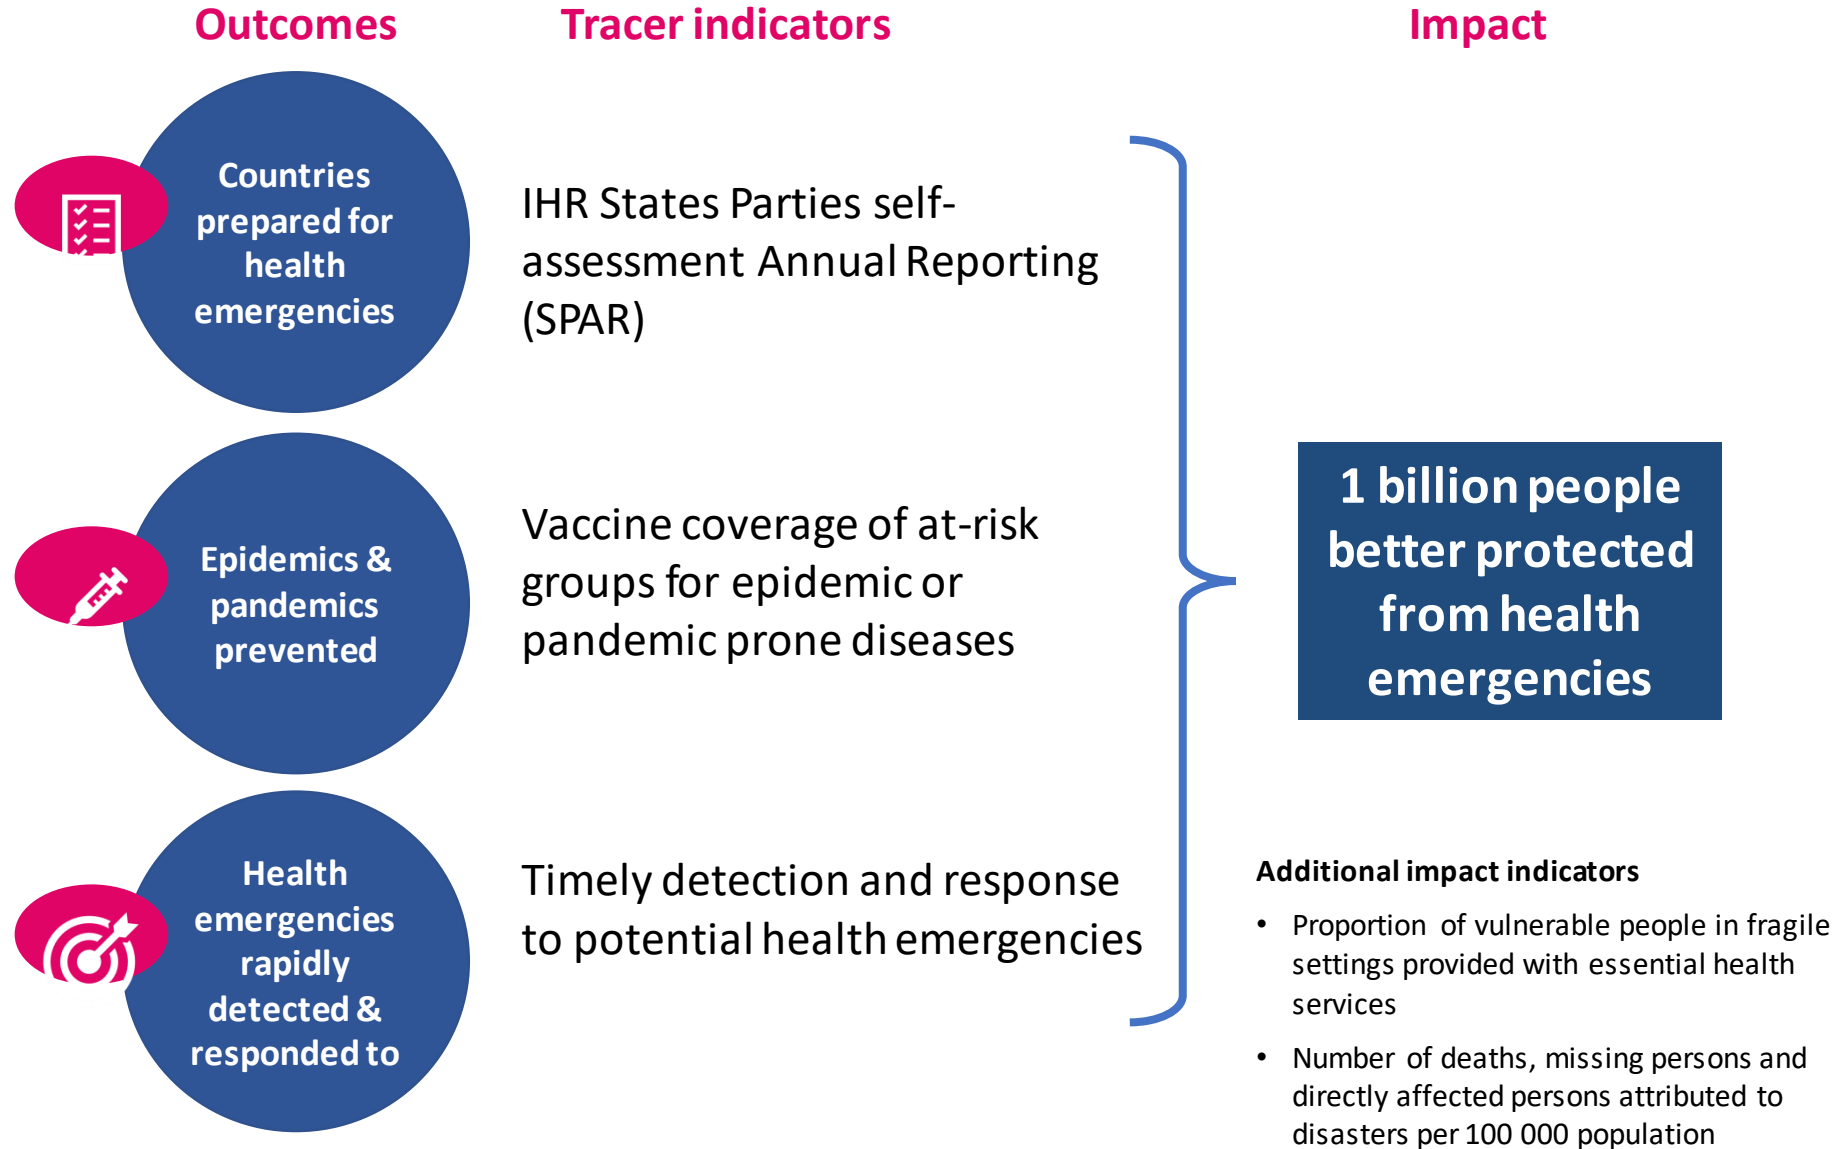

1 billion more people better protected from health emergencies

Outcomes:

1. Countries prepared for health emergencies
2. Epidemics & pandemics prevented
3. Health emergencies rapidly detected & responded to

Better Protected from Health Emergencies Index

The Emergencies Index

Prepare indicator
(IHR capacities)

Prevent indicator
(vaccine coverage)

Detect and respond
indicator

• Average →

Level 1: <30

Level 2: 30–<50

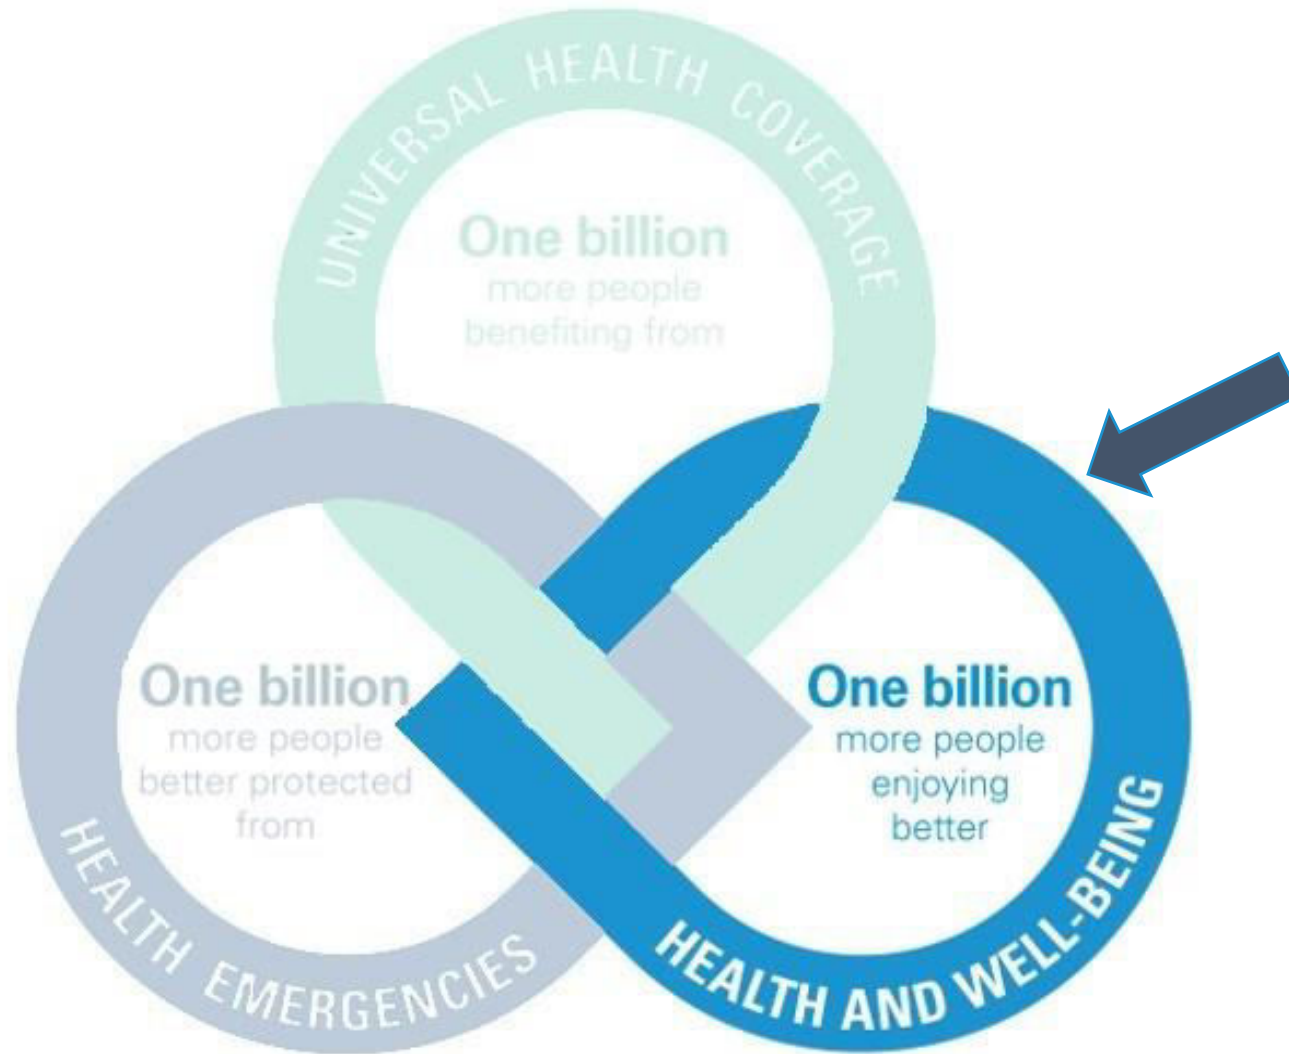

Level 3: 50–<70

Level 4: 70–<90

Level 5: ≥90

- The emergencies index will range from 0 (no protection) to 100 (perfect protection) and will be banded into 5 levels
- No country is at level 5
- Level 1 & 2 contribute to 2.8 billion

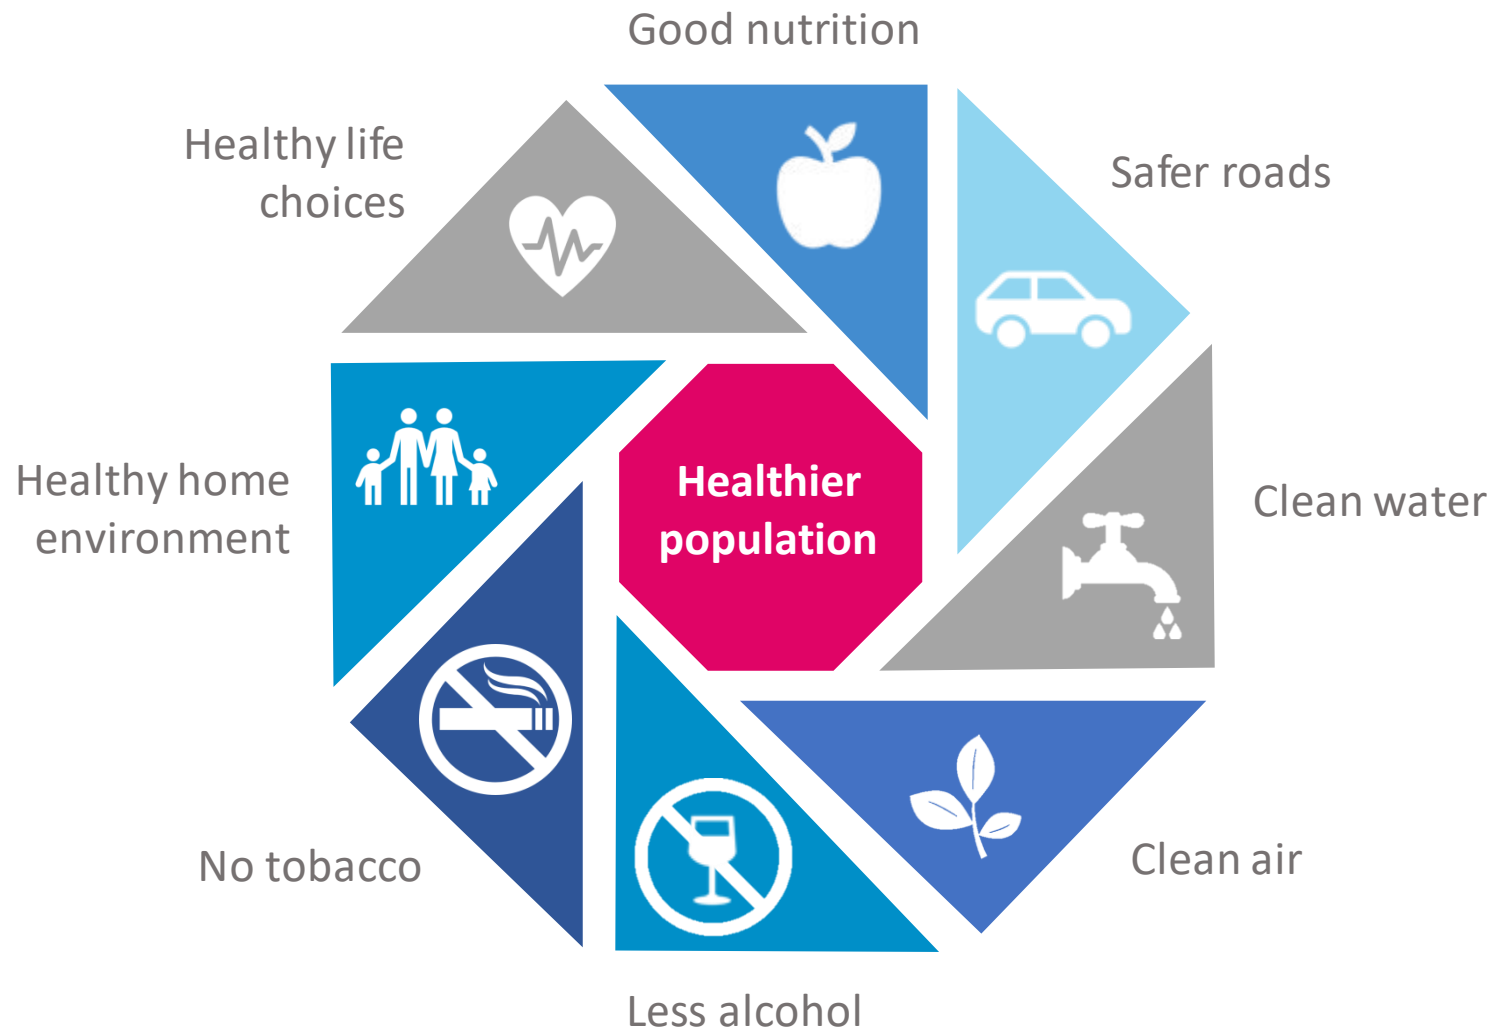

Update on Healthier Population Billion

1 billion more people enjoying better health and well-being

Healthier Populations Index*

- Examples of environmental, social and behavioral risks

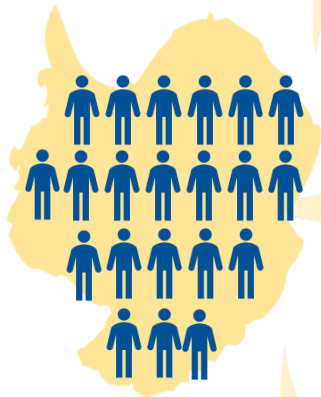

* Methodology in development

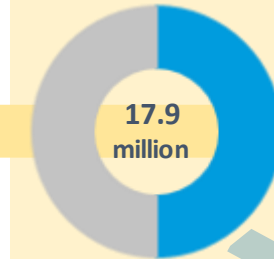

Country contribution to the global triple billion targets

Example

2023 population:
35.7 million

Universal health coverage index

Contribution to global billion

+ 9.0 million

Difference in population covered

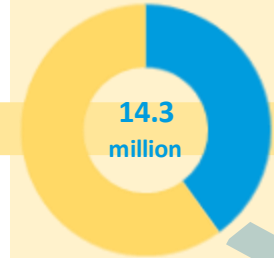

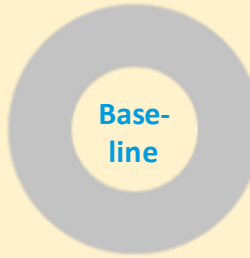

Health emergencies index

+ 35.7 million

If moved up a level = total population

Healthier populations index

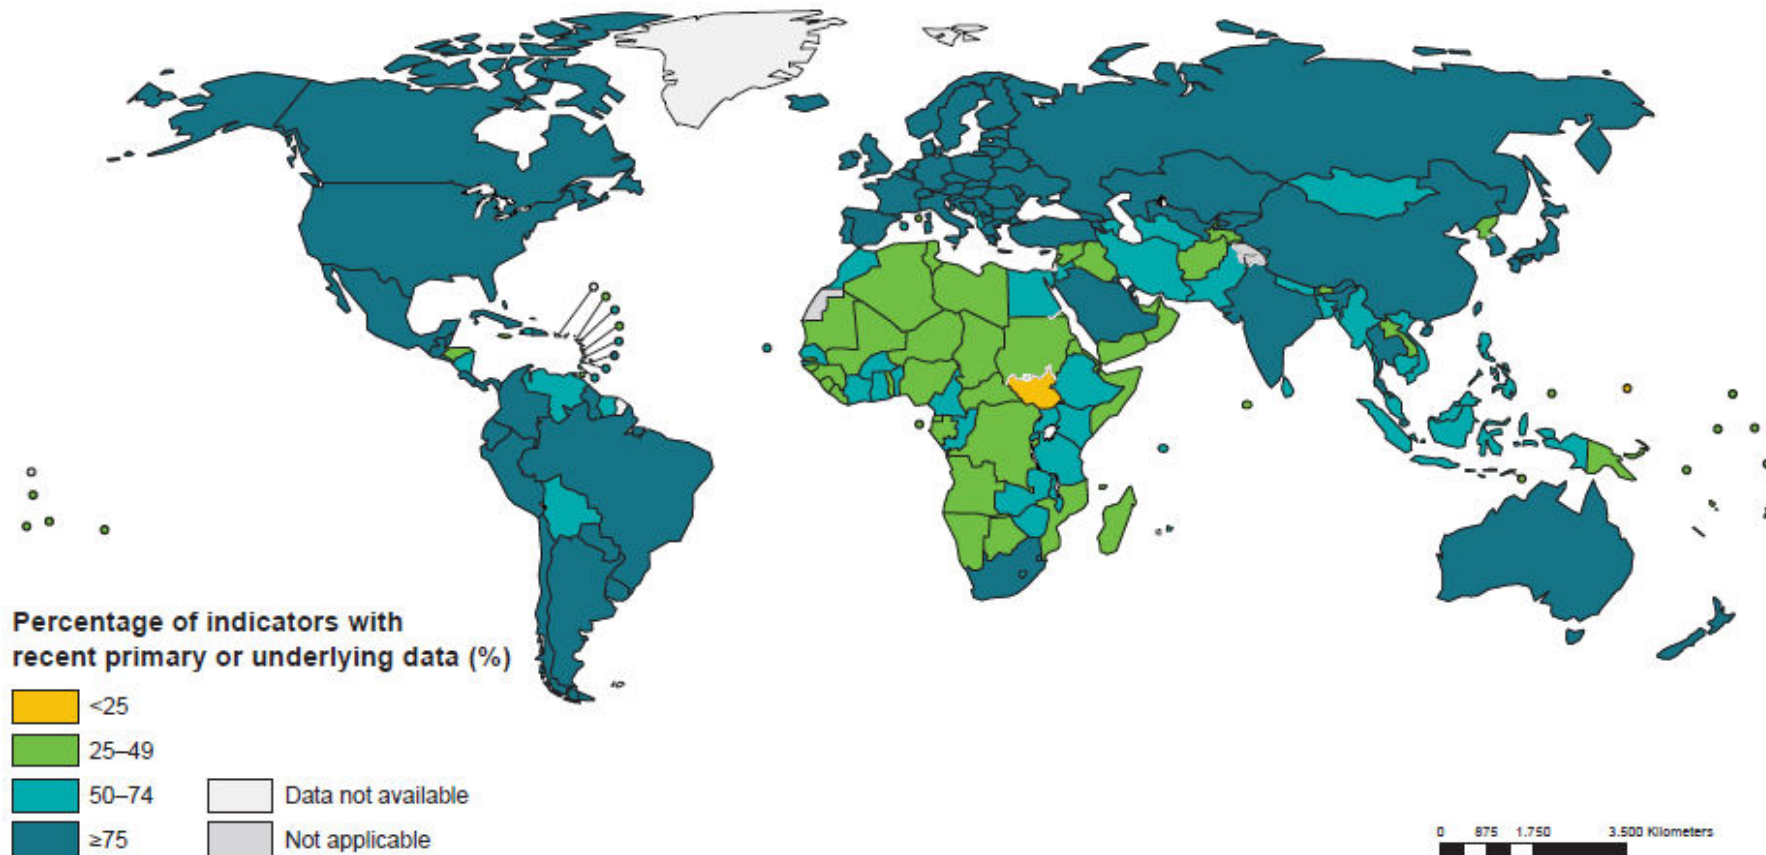

+ 14.3 million

Number of people with healthier lives

Data Availability

One third of countries do not have recent primary or underlying data for over half of the SDG indicators

Availability of recent primary or underlying data to inform global SDG monitoring^a

Key Messages

- Ethiopia to consider the results framework during the preparation of HSTP II
- Indices for the preparation of M&E framework
- Targets during the development of HSTPII targets
- Strengthen its health information system to monitor progress

**THANK YOU
AMESEGGANALEW**
